Care for Our Common Home

RNDM News

The purpose of this newsletter is to provide news of RNDM involvement in actions and activities related to our ministry of Caring for Our Common Home.

Good news story from Senegal:

“A drop of water makes an ocean”

In the month of January and February Sister Seria and Pierre Ibou, the village’s animator, made a visit to all the self-help women groups with an objective to give an awareness about **“CARE FOR OUR COMMON HOME”**.

In the past we spoke about cleaning the village and women have been doing it without much understanding apart from – keep the place clean for good health.

But this time the women become

aware much more that we human beings are not the only ones who live on this earth, there are other creatures who also belong to our big family, thus we need to care for, and respect them.

The talk was about **climate change**, the cause of it and the consequences. If Earth gives us everything for our living, what name shall we give? Can we not call her Mother? The answer is yes. If yes, how we take care of our mother? Are we happy to see her suffering, ill-treated by everyone? If we love our mother we should love our Earth. These are the reflections to the group and the individual.

One of the villages after hearing the talk, decided to pick up the plastic bags that lie around in the field and do so each time on the

day of their cleaning.

This group has become a model to other groups.

WELL DONE! Let us promote these efforts in other places!
